return of used Naloxone kits

The Aberdeenshire Drug and Alcohol Service has set up Step-In points in five main towns so anyone wanting support with drug and alcohol use can get same day treatment. If you wish to access the service you can drop in to these Step-In locations or you will be offered an appointment on the day we get a referral. The Step-In approach offers intensive care to provide a non-judgemental, welcoming and responsive service. All concerns and needs identified at assessment will be listened to. Actions to support these will be provided and included in individualised care plans. This might include rehabilitation or detoxification as best suited to your needs. Harm reduction advice and equipment is also available at the locations. Our multi-disciplinary teams are ready to help anyone needing support with problematic drug or alcohol use. The team is made up of a range of different practitioners: -Nurse - to advise on and prescribe treatment of choice -Social Worker - to provide a range of different supports as part of recovery -Health Care Support Worker - to provide wider health checks and screening -Local Area Coordinator - to provide practical support and access to wider activities -Support Worker from Alcohol and Drugs Action

opens in a new tab - to support people who do not require clinical or social work interventions. The Step-Ins will continue to develop and provide easy access to a wide range of support from key partners including advocacy, housing, welfare benefits and employability. The Step-In points are open from 9am to 5pm Monday to Friday. Appointments will be offered out with these times for people who need it. If you don't live close to these locations our Step-In staff can arrange transport, or they can see you at a time and place suitable to you.
